

# THREE STEPS for a seamless experience of the NDIS

## STEP ONE

I have lots of ideas – how do I turn them into goals?

Creating NDIS goals sucks but we can help you turn them into something helpful. We'll help you consider all the parts of life – not just the services you need. We'll help you pin down what's most important and what's missing that you want to ask support for.

## STEP TWO

I'm really nervous about my NDIS planning meeting.

We will help you create your own document, unique to you and identifying reasonable supports. We also provide you with a checklist you can take into your meeting so you won't forget a thing. **You might be feeling shaky but your voice is strong!**

## STEP THREE

Holy cow! Now I have my plan, what next?

We'll help you create a support system which fits you – not a system you're forced to fit in with. We'll help you action your plan with mentoring, motivation and direct assistance. We are experts in helping you explore your potential and your community, and experience greater control.

## Why InCharge?

**InCharge is independent.** We can help you find the best fit for your needs, regardless of who it's with. We breathe life into your plan and provide a fresh approach with a focus on community solutions, and helping you feel truly in charge.

### People who have used InCharge say they:

- ✓ Finally understand how the NDIS can benefit them
- ✓ Can 'smell and feel' the new opportunities for real choice and control
